Security "hands-free"
 window intercom

Talk through the exclusive hands-free communication system, for use in security.

Model 2005

DESCRIPTION

- It is designed to aid communication where normal speech is impaired by the use of glass security screens. No drilling is required so the operator remains secure.
- Specifically designed for cashier counters or any kind of cash or valuables handling operation.
- The gooseneck microphone and the operating controls are located in a small desk remote unit.
- The electronic system and the internal speaker are in an easy access central cabinet that is connected to the desk remote unit, the circular baffle and the power supply.
- Its excellent sound quality and adequate power result in maximum audio fidelity.

MAIN FEATURES

- 1 or 2 way "hands-free" communication.
- On hold mode: it mutes the microphone on both sides to ensure privacy.
- Reception and transmission volume control.
- Adaptable 60cm gooseneck metallic microphone. High intelligibility.
- Circular baffle: built in triple chrome plated steel sheet, stainless steel grill and anti-moisture treatment.
- Easy installation
- Optional: operator headset (microphone/earphone).

TECHNICAL FEATURES

Specifications:

- Audio output power: 5 watts per channel.
- Distorsion: less than 2%
- Reception: compression 20 Db.
- Transmission: Vox System.
- Operator microphone: dynamic cardioid gooseneck microphone.
- External microphone: omnidirectional Electret microphone.
- Frequency response: Equalized for maximum intelligibility.

POWER SUPPLY

- Individual power supply.

MOUNTING

- No drilling required.
