MODEL IC-2011/C

Description:

Anti-vandalism communication system, consisting of two steel fronts that are installed on both sides of the glass (prisoner-visitor). The front on the prisoner side is totally hands free, it has a two color indicator to show when it is enabled to speak. The front on the visit side has a pushbutton to control the communication direction (Speak / Listen).

FEATURES:

- Easy operation
- Built in metal cabinet, epoxy powder painted.
- Specifically designed to resist damage from sharp objects and/or liquids.
- Vandal-proof Speak / Listen push button.
- High sensibility microphone
- The power supply feeds and enables the equipment remotely.

TECHNICAL FEATURES :

- Individual power supply for each piece of equipment, 12v/500 mA.
- Audio output power: 800 mw
- Internal gain control
- Frequency response equalized for maximum intelligibility
