

# NURSE CALL SYSTEM

Electronic consoles for 12 to 80 points.

IC-40

IC-12

IC-22

## Description:

- High efficiency LED signal.
- Ululating and intermittent audible signal. Possibility of timing sound.
- Pre-adjustable volume control
- The audible signal can be cancelled without cancelling the luminous signal. In case there is a new call, the audible signal will be activated again.
- Possibility to install more than one console in parallel and choose to activate one, other or all of them at the same time.
- Expandable according to necessity with expander 12 to 80 points.
- Pluggable modules for easy replacement. It can be fixed to the wall or desk
